

# The Political Transgender Lobby

The trans lobby and mainstream media are censoring any questioning or critique of "gender identity" ideology. This is a danger for

1. children who are caught in a cult-like epidemic of confusion about their biological sex,
2. women's rights to privacy, safety and their own sports teams and
3. everyone's right to free speech.

Due to this censorship, much of it by the political left, **many people remain uninformed.**

The Political Transgender Lobby is actually an outgrowth of the **Pharmaceutical Lobby**, the largest in congress, **more than 1 Billion Dollars** and larger even than defense or oil. Big Pharma spreads its propaganda on "gender identity" through vast, so-called philanthropy, which, in reality, exerts purse string power over many of our institutions, which themselves are largely uninformed as well. The result: legislation instituting transgender ideology and censoring people who question it.

## Important Facts About Transgenderism and "Gender Identity" Ideology:

1. **Human beings are mammals**, and mammals are male and female; in humans, that is XX and XY. This statement is not bigoted but a statement of clinical fact.
2. To culturally replace the term "sex" with "**gender**" **precludes clear thinking** and separates the discussion from a factual basis, from science and from common sense.
3. "Gender identity" ideology – anyone can be what they *think* they are - is contrary to material reality. Demanding that people play along by using particular pronouns based on such a "gender identity" constitutes  **censorship**.
4. Contrary to its "**inclusivity**" **propaganda**, "Gender identity" ideology reinforces sex stereotypes (girls play with dolls, boys love trucks and baseball) and insists that any child with differing behavior is really "in the wrong body" and must be fixed. This cookie cutter ideology is also **extremely homophobic**. Why? Instead of letting people feel attraction to and love whom they choose, this dogma also interprets love of anything but the opposite sex as an argument for having to "fix" that person.
5. **Women's rights in sports** have been fought hard for, so women can have their own sports teams. Sex-based physical strengths and weaknesses make this separation necessary to maintain fair competition among women and girls.
6. Especially the social media propaganda machine **indoctrinates children** that they can have any "gender identity" and change their sex accordingly. They are encouraged to take health damaging hormones (causing permanent sterility) and get surgery to change their reproductive organs. This constitutes **child abuse**.
7. Since it is factually impossible for a mammal to change their sex, when a male person insists on entering the personal/intimate spaces reserved for female people, he is **invading women's spaces**, an act that used to be considered sexual harassment.
8. The "gender identity" propaganda is largely funded by pharmaceutical, medical, and bio-tech corporations who expect to benefit from the "gender re-assignment" market.
9. "Gender identity" co-opts and undermines the legitimate language of the 400-year-old struggle for civil rights for African Americans, as well as that of intersex people, who are fighting for their rights to safety and privacy and don't consider themselves "transgender".

***We are concerned citizens and encourage you to speak with everyone you know about these issues. Find out what is transpiring in your community and schools to push this ideology. Educate others. Act and speak out together.***
